Professional Frying System Tips and Guide

- When frying battered foods, lower the empty fryer basket into the oil. Then slowly lower food into the fryer basket one piece at a time using tongs. This will help the batter to form a crust and prevent the food from sticking to the basket.
- When frying frozen foods, fill the fryer basket with food, insert the basket lid, lower into oil and cover with fryer cover to minimize oil splattering.
- Do not overfill basket or increase cooking time as food may stick together and not cook properly.
- Cooking oil, even unused, has a limited shelf life. It oxidizes with exposure to air, sunlight, and elevated temperatures, which lowers the quality of the oil.
- Oil will absorb food flavors, so it's a good idea to label the oil storage container with the type of food the oil was last used to cook. For example, don't fry a dessert in oil previously used for cooking fish.
- For best food results, change oil and clean the oil reservoir, fryer basket and control panel often.

Types of Oil to Use: Always use oil with a high smoke point such as: vegetable, canola or peanut oil. Olive Oil or Extra-Virgin Olive Oil should not be used in your fryer due to their low smoke points. Being able to cook at a high temperature ensures the best results, speedy frying, and searing of the exterior of foods to help retain their juices.

RECIPES, HEALTHY HINTS AND TIPS

Use this flavorful, versatile batter to fry chicken cutlets, vegetables and fish. To ensure even cooking, make sure all of the food you will be frying is of similar size and thickness.

INGREDIENTS

- 1 cup all-purpose flour
- 1 ½ cups cold soda or tap water
- ½ cup cornstarch
- 2 teaspoons baking powder
- 1 teaspoon dried red pepper flakes
- ½ teaspoon garlic powder
- ½ teaspoon kosher salt
- Fresh ground black pepper

Frying Batter

Preheat fryer to 375°F. Place the flour, cornstarch, baking powder and water in a mixing bowl. Season with salt, pepper and spices, and mix until all of the ingredients are thoroughly combined. Pat dry then dip each piece of food you are frying into the batter, ensuring that the food is evenly coated and allowing excess batter to drip off. Place the fryer basket in the oil. Using tongs, dip the battered food into the hot oil for about 10 seconds and then release it. This allows the food to form a crust, preventing it from sticking to the basket. Add remaining pieces of food one at a time, being careful not to overcrowd the pot. Place the basket lid on the basket. Fry until the food has reached a golden brown color, 3-5 minutes. Remove the food and place on a plate lined with paper towels or a cooling rack. Serve immediately.
