IMPORTANT SAFEGUARDS
HOUSEHOLD USE ONLY • READ ALL INSTRUCTIONS BEFORE USE

Read and review instructions for operation and use.
Take care to avoid contacts with hot surface. Always use hand protection to avoid burns.
For indoor and household use only.

Read all instructions before using your Ninja® Foodi™ Pro Grill.

When using electrical appliances, basic safety precautions should always be followed, including the following:

⚠️ WARNING

1. Remove and discard the protective cover fitted on the power plug of this appliance.
2. This appliance can be used by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
3. Keep the appliance and its cord out of reach of children. DO NOT allow the appliance to be used by children. Close supervision is necessary when used near children.
4. This appliance is for household use only. DO NOT use this appliance for anything other than its intended use. DO NOT use in moving vehicles or boats. DO NOT use outdoors. Misuse may cause injury.
5. Ensure the surface is level, clean and dry. DO NOT place the appliance near the edge of a countertop during operation.
6. ALWAYS ensure the appliance is properly assembled before use.
7. When using this appliance, provide at least 6 inches (15.25 cm) of space above and on all sides for air circulation.
8. DO NOT use an extension cord. A short power-supply cord is used to reduce the risk of children grabbing the cord or becoming entangled and to reduce the risk of people tripping over a longer cord.
9. To protect against electrical shock DO NOT immerse cord, plugs, or main unit housing in water or other liquid.
10. DO NOT use the appliance if there is damage to the power cord or plug. Regularly inspect the appliance and power cord. If the appliance malfunctions or has been damaged in any way, immediately stop use and call Customer Service.
11. NEVER use outlet below countertop surface.
12. DO NOT place appliance and let cord hang over edges of tables, counters or touch hot surfaces.
13. Only use recommended accessories included with this appliance or authorized by SharkNinja. The use of accessories or attachments not recommended by SharkNinja may cause a risk of fire or injury.
14. Before placing any accessory into the cooker, ensure they are clean and dry.
15. DO NOT use the appliance without the removable cooking pot and splatter shield installed.
16. ALWAYS ensure hood is fully closed before operating.
17. DO NOT move the appliance when in use.
18. DO NOT cover the air intake vent or air outlet vent while unit is operating. Doing so will prevent even cooking and may damage the unit or cause it to overheat.
19. DO NOT touch hot surfaces. Appliance surfaces are hot during and after operation. To prevent burns or personal injury, ALWAYS use protective hot pads or insulated oven mitts and use available handles and knobs.
20. DO NOT touch accessories during or immediately after cooking. The grill grate and basket becomes extremely hot during the cooking process. Avoid physical contact while removing the accessory from the appliance. To prevent burns or personal injury ALWAYS use care when interfacing with product. Recommend use of long handed utensil and protective hot pads or insulated oven mitts.
21. DO NOT use this appliance for deep-frying.
22. The Ninja Integrated Smart Temperature Probe does NOT replace an external food thermometer.
23. To prevent possible illness, ALWAYS use a thermometer to check that your food is cooked to the recommended temperatures.
24. Should a grease fire occur or the unit emits black smoke, unplug immediately. Wait for smoking to stop before removing any cooking accessories.
25. Please refer to the Cleaning & Maintenance section for regular maintenance of the appliance.
26. To disconnect, turn unit to “off”, then unplug from socket when not in use and before cleaning.
27. Allow to cool before cleaning, disassembly, putting in or taking off parts and storage.
28. DO NOT clean with metal scouring pads. Pieces can break off the pad and touch electrical parts, creating a risk of electric shock.
29. Cleaning and user maintenance shall not be made by children.

GETTING TO KNOW THE NINJA® FOODI™ PRO GRILL

FUNCTION BUTTONS

- GRILL: Grill indoors while creating even char, grill marks, and grilled flavor.
- AIR CRISP: For crispiness and crunch with little to no oil.
- ROAST: Tenderize meats, roast vegetables, and more.
- BAKE: Bake cakes, treats, desserts, and more.
- DEHYDRATE: Dehydrate meats, fruits, and vegetables for healthy snacks.

OPERATING BUTTONS

- POWER button: Once the unit is plugged in, press the power button to turn on the unit. Pressing it during cooking stops the current cooking function and turns off the unit.
- TEMP iQ button: Allows you to set an alert when using the temperature probe so you know when food is cooked to your preferred doneness. TEMP iQ does not work with the Dehydrate function.
- TEMP arrows: Use the up and down TEMP arrows when in TEMP iQ mode to set the probe alert temperature.
- TIME arrows: Use the up and down TIME arrows to adjust the cook time in any function. When using the TEMP iQ button, setting the time is not an available option.
- START/STOP button: After selecting temperature and time, press the START/STOP button to begin cooking.

STANDBY MODE

The unit will go into Standby Mode if cooking is not in process and there has been no interaction with the control panel for 10 minutes.

BEFORE FIRST USE

1. Remove all packaging material, promotional labels, and tape from the unit.
2. Remove all accessories from the package and read this manual carefully. Please pay particular attention to operational instructions, warnings, and important safeguards to avoid any injury or property damage.
3. Wash the grill grate, splatter shield, crisper basket, roasting rack, temperature probe, cleaning brush, and cooking pot in warm, soapy water, then rinse and dry thoroughly. The grill grate, splatter shield, crisper basket, roasting rack, cleaning brush, and cooking pot are also dishwasher safe. NEVER clean the main unit or temperature probe in the dishwasher.

*Not all functions are included on every model.
USING THE NINJA® FOODI™ PRO GRILL

SPLATTER SHIELD
Located on the underside of the hood, the splatter shield keeps the heating element clean and minimizes smoke. The splatter shield is removable for cleaning, but we recommend keeping it in place when cooking.

Removing the splatter shield
Remove the splatter shield for cleaning after every use. First allow the splatter shield to cool completely, then remove it by using your thumb to release the front clip by pushing the front clip upwards and using your other hand to pull one of the outer tabs toward you. This will release the splatter shield, allowing you to pull it out of the slot along the back of the hood.

Installing the splatter shield
To install, gently push the splatter shield into the back of the hood. Insert the back shield into the clip by pushing the front clip upward and into the back of the hood. Insert the back of the slot along the back of the hood.

GRILL CONTROL TECHNOLOGY
Our technology allows you to control the temperature of the grill grate for precise cooking and keep smoke out of the kitchen. When using the Grill function, you will need to select the grate temperature setting. Below are recommended temperature levels for common ingredients.

<table>
<thead>
<tr>
<th>LOW 400°F</th>
<th>MEDIUM 450°F</th>
<th>HIGH 500°F</th>
<th>MAX up to 550°F</th>
</tr>

</tbody>
</table>
| thick BBQ | | | | sauce

**NOTE:** The unit could create smoke during the cooking process. For less smoke, we recommend using canola, coconut, avocado, grapeseed, or vegetable oil instead of olive oil.

**NOTE:** The unit may produce smoke when cooking meats on a hotter setting than what is recommended. For more cooking charts, refer to your Inspiration Guide or visit ninjakitchen.com.

Switching to Grill after using another function
If the unit is already warm from using a different function, and the grill grate is at room temperature when you place it in the unit, “Add Food” may appear on the screen immediately. We recommend allowing the grill grate to heat up for at least 6 minutes before placing ingredients on it. As the unit continues to run and the grill grate heats up, “Add Food” will remain on the screen until you open the hood and place ingredients on the grate.

Batch grilling
When grilling more than two consecutive batches of food, it is recommended that you empty the fat/oil from the removable cooking pot. This will help prevent grease from burning and causing smoke. We also recommend allowing the grill grate to heat back up for at least 3-5 minutes between batches to ensure consistent grill marks and char.

USING THE INTEGRATED SMART TEMPERATURE PROBE
1 After selecting the desired cook function and temperature, plug the temperature probe into the socket located on the right side of the control panel. The probe must be plugged in before setting the probe alert. Make sure the probe cord is free of knots. (The probe cannot be used with the Dehydrate function.)

2 Press the TEMP IQ button and use the TEMP up and down arrows to select the desired internal cook temperature (100°F–170°F). Use the chart below to help determine the desired internal cook temperature.

**NOTE:** If you need to adjust the function temperature, press the TEMP IQ button again to exit TEMP IQ mode. The unit will return to the function temperature setting.

**NOTE:** The Ninja® Foodi™ Pro Grill cooks quickly, so these recommended internal temperature settings are based on how this unit cooks and may seem lower than recommended temperature doneness for other appliances. Internal food temperature continues to rise as food rests. This is known as carry-over cooking, and it occurs when food rests for at least 5 minutes after being removed from the heat.

Carry-over cook temperatures are based on foodsafety.gov charts: foodsafety.gov/keep/charts/mintemp.html
USING THE NINJA® FOODI™ PRO GRILL – CONT.

3 Place the accessory required for your selected cook function in the unit and close the hood. Press START/STOP to begin preheating. While the unit is preheating, insert the probe horizontally into the center of the thinnest part of the largest piece of protein, close to (but not touching) the bone. **DO NOT** insert the probe vertically or at an angle, as it will not deliver an accurate reading. **ALWAYS** insert it into the thickest piece of protein.

5 When the inside of your food reaches the temperature you have set, the unit will beep and the probe icon will blink. The display will continue to show the internal temperature of your food. You can turn off the probe at any time by pressing START/STOP. **ALWAYS** remove food immediately once the desired internal temperature is reached to prevent overcooking.

6a Probe cooking complete: Remove protein from the unit, keeping the probe inserted, and place it on a plate to rest for at least 5 minutes. The protein will carry-over cook while it is resting. When it reaches the carry-over cook temperature in the chart on the previous page, cooking is complete.

6b Cooking more food without the probe: If you are cooking more food using the same function, but do not need to use the probe, simply press TEMP iQ and use the TEMP down arrow to set the probe to “OFF.” Then press the up TIME arrow to set a new cook time. Adjust the function temperature if needed. **ALWAYS** press START/STOP to begin. If you are cooking more food using a different function, select that function before setting the new cook time and temperature.

**NOTE:** You can check the internal temperature of food at any time, even if a cook function is not running. Simply press the TEMP iQ button for 2 seconds.

6c Batch cooking with the probe: If you are batch cooking more protein, remove the probe from the cooked protein and insert it in the center of the largest piece of uncooked protein. Press the TEMP iQ button, set the desired internal temperature, and press START/STOP. “Add Food” will display, let the unit run for approximately 3 minutes before opening the hood and adding the next batch of protein. Then follow step 5.

NOTE: DO NOT touch the hot probe or cord with bare hands during or just after cooking. Always wear heat-resistant gloves.

COOKING FUNCTIONS

Ensure the unit is plugged in before turning it on. Press the power button.

Grill

1 Place the cooking pot in the unit with the indent on the pot aligned with the rear bump on the main unit. Then place the grill grate in the pot with the handles facing up. Ensure the splatter shield is in place and close the hood.

2 Press the GRILL button. The default temperature level will illuminate on the left side of the control panel and the corresponding air temperature will appear on the display screen. Press the Grill button or the up and down TEMP arrows to adjust the temperature setting.

3 Press the up and down TIME arrows to set the cook time, in 1-minute increments, up to 30 minutes, or follow the instructions on page 9 to set a probe temperature using TEMP iQ.

4 Press START/STOP to begin preheating. PRE will appear on the display screen, and the progress bar will begin. It can take approximately 8 minutes to preheat.

5 When preheating is complete, the unit will beep and “Add Food” will flash across on the display screen.

6 Open the hood and place ingredients on the grill grate. Once the hood is closed, cooking will begin and the timer will start counting down.

**NOTE:** If you would like to use the temperature probe just to check your food, press TEMP iQ for 2 seconds and the food’s internal temp will appear on the screen for 5 seconds. If the screen starts to blink, you didn’t hold the button long enough. Refer to the Troubleshooting section.

7 When cook time is complete, the unit will beep and END will appear on the display screen. If you need to add more time to cook your food, press the TIME up arrow and press START/STOP. Time adjustment differs when using the probe. Reference page 10, step 6b when using the probe.

8 Keep the hood open after removing your food so the unit will cool down more quickly. The stainless steel wrap on the exterior of the unit will be hot after cooking.

**NOTE:** If batch cooking, refer to the bottom of page 8 for instructions.
**USING THE NINJA® FOODI™ PRO GRILL – CONT.**

**Air Crisp**

1. Place cooking pot in the unit with the indent on the pot aligned with the bump on the main unit. Place the crisper basket in the pot, then close the hood.

2. Press the AIR CRISP button. The default temperature setting will display. Use the up and down TEMP arrows to adjust the temperature.

3. Use the up and down TIME arrows to set the cook time, in 1-minute increments, up to 1 hour, or follow the instructions on page 9 to set a probe temperature using TEMP iQ.

4. Press START/STOP to begin preheating. PRE will appear on the display screen, and the progress bar will begin. It can take up to 3–5 minutes to preheat.

5. When preheating is complete, the unit will beep and “Add Food” will flash across on the display screen.

6. Open the hood and place ingredients in the crisper basket. Once the hood is closed, cooking will begin and the timer will start counting down.

7. For best results, we recommend shaking ingredients frequently. When you open the hood, the unit will pause. Use silicone-tipped tongs or oven mitts to shake the basket. When done, replace the basket and close the hood. Cooking will automatically resume after hood is closed.

8. When cook time is complete, the unit will beep and END will appear on the display screen. Remove your food and close the hood. If you need to add more time to cook your food, simply press the TIME up arrow and press START/STOP.

**Roast**

1. Place cooking pot and roasting rack in the unit with the indent on the pot aligned with the bump on the main unit, then close the hood.

2. Press the ROAST button. The default temperature setting will display. Use the up and down TEMP arrows to adjust the temperature.

3. Use the up and down TIME arrows to set the cook time, in 15-minute increments, up to 4 hours, or follow the instructions on page 9 to set a probe temperature using TEMP iQ.

4. Press START/STOP to begin preheating. PRE will appear on the display screen, and the progress bar will begin. It can take up to 3–5 minutes to preheat.

5. When preheating is complete, the unit will beep and “Add Food” will flash across on the display screen.

6. Open the hood and place ingredients in the pot. Once the hood is closed, cooking will begin and the timer will start counting down.

7. For best results, we recommend shaking ingredients frequently. When you open the hood, the unit will pause. Use silicone-tipped tongs or oven mitts to shake the basket. When done, replace the basket and close the hood. Cooking will automatically resume after hood is closed.

8. When cook time is complete, the unit will beep and END will appear on the display screen. Remove your food and close the hood. If you need to add more time to cook your food, simply press the TIME up arrow and press START/STOP.

**NOTE:** While preheating is strongly recommended for best results, you can skip it by pressing the AIR CRISP button again. “Add Food” will flash across the screen. Open the hood and place ingredients in the crisper basket. Once the hood is closed, cooking will begin and the timer will start counting down.

**NOTE:** While preheating is strongly recommended for best results, you can skip it by pressing the ROAST button again. “Add Food” will flash across the screen. Open the hood and place ingredients in the crisper basket. Once the hood is closed, cooking will begin and the timer will start counting down.

**NOTE:** Convert traditional recipes by reducing the temperature by 25°F. Check food frequently to avoid overcooking.

**NOTE:** If you would like to use the temperature probe just to check your food, press TEMP iQ for 2 seconds and the food’s internal temp will appear on the screen for 5 seconds. If the screen starts to blink, you didn’t hold the button long enough. Refer to the Troubleshooting section.

**NOTE:** If you would like to use the temperature probe just to check your food, press TEMP iQ for 2 seconds and the food’s internal temp will appear on the screen for 5 seconds. If the screen starts to blink, you didn’t hold the button long enough. Refer to the Troubleshooting section.
**USING THE NINJA® FOODI™ PRO GRILL – CONT.**

### Bake

1. Place cooking pot in the unit with the indent on the pot aligned with the bump on the main unit, then close the hood.

2. Press the BAKE button. The default temperature setting will display. Use the up and down TEMP arrows to adjust the temperature.

3. Use the up and down TIME arrows to set the cook time, in 15-minute increments, up to 4 hours, or follow the instructions on page 9 to set a probe temperature using TEMP iQ.

4. Press START/STOP to begin preheating. PRE will appear on the display screen, and the progress bar will begin. It can take up to 3 minutes to preheat.

### Dehydrate

NOTE: While preheating is strongly recommended for best results, you can skip it by pressing the BAKE button again. “Add Food” will flash across the screen. Open the hood and place ingredients in the crisper basket. Once the hood is closed, cooking will begin and the timer will start counting down.

5. When preheating is complete, the unit will beep and “Add Food” will flash across on the display screen.

6. Open the hood and add ingredients to the pot or set your bake pan directly in the bottom of the pot, and close the hood to start cooking. Once the hood is closed, cooking will begin and the timer will start counting down.

### NOTE:
Convert traditional recipes by reducing the temperature by 25°F. Check food frequently to avoid overcooking.

7. When cook time is complete, the unit will beep and END will appear on the display screen. If you need to add more time to cook your food, simply press the TIME up arrow and press START/STOP.

### NOTE:
If you would like to use the temperature probe to just check your food, press TEMP iQ for 2 seconds and the food’s internal temp will appear on the screen for 5 seconds. If the screen starts to blink, you didn’t hold the button long enough. Refer to the Troubleshooting section.

### NOTE:
When dehydration is complete, the unit will beep and END will appear on the display screen. Remove your food and close the hood.

### NOTE:
The TEMP iQ button and temperature probe are not available for use with the Dehydrate function.

1. Place cooking pot in the unit with the indent on the pot aligned with the bump on the main unit, then add a single layer of ingredients to the bottom of the pot. Place the crisper basket in the pot and add a layer of ingredients to the bottom of the basket. Close the hood.

2. Press the DEHYDRATE button. The default temperature setting will display. Use the up and down TEMP arrows to set the desired temperature.

3. Use the up and down TIME arrows to set the dehydration time, in 15-minute increments, up to 12 hours.

4. Press START/STOP to begin. The unit does not preheat in Dehydrate mode.

### NOTE:
During dehydration, you can open the hood to check on your food. The timer will pause when the hood is opened and then automatically resume after it is closed.

### NOTE:
While preheating is strongly recommended for best results, you can skip it by pressing the BAKE button again. “Add Food” will flash across the screen. Open the hood and place ingredients in the crisper basket. Once the hood is closed, cooking will begin and the timer will start counting down.

### NOTE:
When dehydration time is complete, the unit will beep and END will appear on the display screen. Remove your food and close the hood.

### NOTE:
 avis to use with the Dehydrate function.

### NOTE:
During dehydration, you can open the hood to check on your food. The timer will pause when the hood is opened and then automatically resume after it is closed.
TROUBLESHOOTING

- "Add Food" appears on the control panel display.
  The unit has completed its Grill preheating and it is now time to add your ingredients.
- "Shut Lid" appears on the control panel display.
  The hood is open and needs to be closed for the selected function to start.
- "Add Pot" appears on the control panel display.
  The pot is not installed in the unit.
- "Plug In" appears on the control panel display.
  The temperature probe is not plugged into the socket on the right side of the control panel.
  Plug the temperature probe in before proceeding.
- "E" appears on the control panel display.
  The unit is not functioning properly. Please contact Customer Service at 1-877-646-5288.
- Why is my unit emitting smoke?
  The temperature probe is not plugged into the socket on the right side of the control panel. Plug the temperature probe in before proceeding.
- Why is my food blowing around when air crisping?
  The unit is not functioning properly. Please contact Customer Service at 1-877-646-5288.
- Why doesn't my food cook when air crisping?
  The hood is open and needs to be closed for the selected function to start.
- Why is my food burned?
  The pot is not installed in the unit.
- Is it safe to put the cooking pot on my countertop?
  The pot will heat during cooking. Use caution when handling, and place on heat-safe surfaces only.
- Why does the preheat progress bar not start from the beginning?
  This is a progress bar indicating how far along you are in the preheating cycle.
- Why is my food overcooked or undercooked even though I used the probe?
  When the unit is warm from previously being used, it will not require the full preheating time.
- Can I cancel or override preheating?
  Preheating is highly recommended for best results, but you can skip preheating by selecting the function again after you press the START/STOP button. However, you cannot override preheating when using the Grill function.
- Should I add my ingredients before or after preheating?
  For best results, let the unit preheat before adding ingredients.
- Why is my unit emitting smoke?
  When using the Grill function, always select the recommended temperature setting. Recommended settings can be found in the Quick Start Guide and in the Inspiration Guide. Make sure the splatter shield is installed.
- How do I pause the unit so I can check my food?
  When the hood is opened during a cooking function, the unit will automatically pause.
- Is it safe to put the cooking pot on my countertop?
  The pot will heat during cooking. Use caution when handling, and place on heat-safe surfaces only.
- My food is burned.
  Do not add food until recommended preheat time is complete. For best results, check progress throughout cooking, and remove food when desired level of brownness has been achieved. Remove food immediately after the cook time is complete to avoid overcooking.
- My food didn't cook when air crisping.
  For consistent browning, make sure ingredients are arranged in an even layer on the bottom of the crisper basket with no overlapping. Shake loose ingredients during cooking for consistent crispiness.
- Why is my food blowing around when air crisping?
  Occasionally, the fan will blow lightweight foods around. To prevent this, secure loose food (like the top slice of bread on a sandwich) with toothpicks.
- Can I air crisp fresh battered ingredients?
  Yes, but use the proper breading technique. It is important to coat foods first with flour, then with egg, and then with bread crumbs. Be sure to press the bread crumbs onto the food so they stick in place. Loose breading may be blown off by the unit's powerful fan.

Why is the control panel display no longer illuminated?
The unit is off. Press the power button to turn it back on.

How do I turn off the temperature probe during cooking?
Press the TEMP iQ button and use the TEMP down arrow button to set the probe to "OFF."

Can I use the probe to check on food when the unit isn't cooking in TEMP iQ mode?
Yes, just insert the probe in the food, then press the TEMP iQ button for 2 seconds and the food's internal temp will appear on the screen for 5 seconds. If you don't hold the button down for the full 2 seconds, the unit will switch to TEMP iQ mode, as that mode is activated by a quicker press of the button. If this happens, "165F" will flash on the screen 5 times. After that, press the TEMP iQ button again, then press the TEMP down arrow until "OFF" appears on the control panel display. The unit will then return to your set cook function and the timer will resume counting down.

Why is my food overcooked or undercooked even though I used the probe?
It is important to insert the temperature probe lengthwise into the thickest part of the ingredient to get the most accurate reading. For more information, refer to the Using the Integrated Smart Temperature Probe section.

CLEANING THE NINJA® FOODI™ PRO GRILL

The unit should be cleaned thoroughly after every use. Always let the appliance cool before cleaning.

- Unplug the unit from the wall outlet before cleaning. Keep the hood open after removing your food so the unit will cool down more quickly.
- The cooking pot, grill grate, crisper basket, splatter shield, cleaning brush, and any other included accessories are dishwasher safe, except the temperature probe. DO NOT place the temperature probe in the dishwasher.
  - If hand-washing, use the cleaning brush to remove the grease from the stainless steel frame and front tabs.
  - To deep clean the temperature probe, soak the stainless steel probe and silicone grip in warm, soapy water and allow to soak for a couple hours or overnight. After soaking, use the cleaning brush to clean each part.

The unit is off. Press the power button to turn it back on.

- If food residue or grease are stuck on the grill grate, splatter shield, or any other removable part, place them in a sink or stack them in the pot and fill with warm, soapy water and allow to soak for a couple hours or overnight. After soaking, use the cleaning brush to clean each part.

NOTE: DO NOT use liquid cleaning solution on or near the probe socket. We recommend using compressed air or a cotton swab to avoid damaging the socket.

NOTE: NEVER use abrasive tools or cleaners. NEVER immerse the main unit in water or any other liquid.

REPLACEMENT PARTS

To order additional parts and accessories, visit ninjagadgets.com or contact Customer Service at 1-877-646-5288. So we may better assist you, please register your product online at registeryourninja.com and have the product on hand when you call.
ONE (1) YEAR LIMITED WARRANTY

The One (1) Year Limited Warranty applies to purchases made from authorized retailers of SharkNinja Operating LLC. Warranty coverage applies to the original owner and to the original product only and is not transferable.

SharkNinja warrants that the unit shall be free from defects in material and workmanship for a period of one (1) year from the date of purchase when it is used under normal household conditions and maintained according to the requirements outlined in the Owner’s Guide, subject to the following conditions and exclusions:

What is covered by this warranty?
1. The original unit and/or non-wearable parts deemed defective, in SharkNinja’s sole discretion, will be repaired or replaced up to one (1) year from the original purchase date.
2. In the event a replacement unit is issued, the warranty coverage ends six (6) months following the receipt date of the replacement unit or the remainder of the existing warranty, whichever is later. SharkNinja reserves the right to replace the unit with one of equal or greater value.

What is not covered by this warranty?
1. Normal wear and tear of wearable parts (including cooking pot, grill grate, crisper basket, splatter shield, temperature probe, etc.), which require regular maintenance and/or replacement to ensure the proper functioning of your unit, are not covered by your warranty. Replacement parts are available for purchase at ninjaaccessories.com.
2. Any unit that has been tampered with or used for commercial purposes
3. Damage caused by misuse, abuse, negligent handling, failure to perform required maintenance (e.g., failure to keep the splatter shield and grease collector clean), or damage due to mishandling in transit.
4. CONSEQUENTIAL and INCIDENTAL damages.
5. Defects caused by repair persons not authorized by SharkNinja. These defects include damages caused in the process of shipping, altering, or repairing the SharkNinja product (or any of its parts) when the repair is performed by a repair person not authorized by SharkNinja.
6. Products purchased, used, or operated outside North America.

How to get service
If your appliance fails to operate properly while in use under normal household conditions within the warranty period, visit ninjakitchen.com/support for product care and maintenance self-help. Our Customer Service Specialists are also available at 1-877-646-5288 to assist with product support and warranty service options, including the possibility of upgrading to our VIP warranty service options for select product categories. So we may better assist you, please register your product online at registeryourninja.com and have the product on hand when you call.

SharkNinja will cover the cost for the customer to send in the unit to us for repair or replacement. A fee of $19.95 (subject to change) will be charged when SharkNinja ships the repaired or replacement unit.

How to initiate a warranty claim
You must call 1-877-646-5288 to initiate a warranty claim. You will need the receipt as proof of purchase. We also ask that you register your product online at registeryourninja.com and have the product on hand when you call, so we may better assist you. A Customer Service Specialist will provide you with return and packing instruction information.

How state law applies
This warranty gives you specific legal rights, and you also may have other rights that vary from state to state. Some states do not permit the exclusion or limitation of incidental or consequential damages, so the above may not apply to you.
